

REMARKS/ARGUMENTS

Entry of the foregoing amendments is requested.

Claims 64, 65 and 66 have been revised to correct errors in the recited formulas. The corrected formulas find support throughout the application, particularly in the Examples. In this regard, the Examiner's attention is directed to formula 1 on pages 34 and 44 of the application where the structure now recited in claim 66 is presented (albeit in inverted form). It will be apparent from the chemistry involved that a comparable correction of the structures recited in claims 64 and 65 is appropriated. New claims 87 and 88 have been added. The claims are fully supported by an enabling disclosure including the claims as originally filed and the Examples provided.

An early and favorable Action on the merits is requested.

Respectfully submitted,

NIXON & VANDERHYE P.C.
